A. Purpose. [Generally.] In the development and execution of this section it is recognized that there are some uses which, because of their very nature, are recognized as having serious objectionable characteristics, and that may result in adverse secondary effects on adjacent properties, particularly when several are concentrated together or are located in proximity to businesses of a community nature, residential areas, houses of worship and schools, or both thereby having a deleterious effect upon the adjacent areas. Special regulation of these uses is necessary to ensure that the location and concentration of these uses will have a minimal negative impact on the surrounding neighborhood. These regulations are intended to establish criteria by which their use will have a minimum adverse impact on the surrounding properties.
